

Berkay Çelik

Software Developer

I worked on various project as a backend developer. I developed back-ends for frontend & mobile applications with backend languages such as Java, Nodejs, GoLang. I'm interested in highly scalable bacend applications, and cloud architectures.

Education

2014-09 -

2018-06

Bachelor of Science: Computer Engineering

Ege University - Izmir, Turkey

Projects

Rapsodo Live Platform

We started a new project to collect data and videos from live games. I used Golang, PostgreSQL, Elastic Search, Kafka, Redis technologies for this project.

Rapsodo Baseball Cloud

This project consists of various different applications, such as ThirdParty API, Admin Panel, SPA Web Applications. Most of the applications is hosted on GCP Run. I used NodeJS, AngularJS, MongoDB

YapiKredi Merchant & POS Application

I worked as a part of the Merchant Application Development Team. This project is mainly about money transfer between payment accounts and blocked accounts of customers. I used Java Spring, PLSQL, Power Designer and Atlassian SDLC Products.

YapiKredi Internet Banking

I worked as a part of the Internet Banking Team. I used Java Spring, OracleDB and JS technologies for this project..

Aksigorta CRM

In my part-time work experience, I am part of team who is developing CRM customizations. We developed Web Services, Plug-ins and Web Resources with C#,HTML, CSS and Javascript
JavaScript for AkSigorta. We are using Team Foundation Server for version control.
